

# WSDOT ADA Post Construction Inspection Form Guidance

The form shall be submitted as soon as possible after curb ramps or sidewalks have been installed, and inspected.

**Incomplete forms will be returned to the contractor for verification and correction.**

WSDOT project offices: upon acceptance of this completed form, please email it promptly to [adasteward@wsdot.wa.gov](mailto:adasteward@wsdot.wa.gov).

## Location Information

Location of sidewalks and ramps shall be referenced by linear latitude and longitude measurements of the site location. If there is more than one ramp at each corner, all ramps need to be documented.

## Non-Compliant Construction

Generally, a non-compliant sidewalk, or ramp will not be allowed to remain in place. If non-compliance is due to contractor's performance or any reason that is not determined technically infeasible, structurally impracticable or a safety issue, the ramp will need to be made compliant before the project is considered substantially complete.

**Any forms submitted with non-compliant features shall be reviewed and corrected, or must include, an approved Maximum Extent Feasible document and marked Compliant with a MEF.**

***\*Note: The form must be saved and submitted in the original PDF format. Please do not submit JPG, TIFF or any other non PDF format.***
